

Muhammad Sohaib

Web Developer | UI/UX Designer | Computer Vision Enthusiast

sohaibmuhammad429@gmail.com | github.com/sohaib075 | linkedin.com/in/muhammad-sohaib-5b894524a | +92 309 4257950

Professional Summary

Enthusiastic Web Developer, UI/UX Designer, and Computer Vision enthusiast skilled in React, TypeScript, Tailwind CSS, JavaScript, Node.js, Python, and OpenCV. Experienced in building full-stack applications, responsive websites, designing user-friendly interfaces, and implementing AI-based computer vision projects. Adept at bridging design and development to deliver seamless user experiences. Strong problem-solving skills with a passion for innovation and a collaborative mindset.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, TypeScript, Tailwind CSS, Bootstrap
Backend & Database: Node.js & Express.js (Basics), MySQL, MongoDB (Basics)
UI/UX Design: Figma, Wireframing, Prototyping, Design Systems, User Research, Responsive Design
Computer Vision & AI: Python, OpenCV, NumPy, TensorFlow, PyTorch, YOLOv8, Image Processing, OCR
Tools & Others: Git, GitHub

Education

FAST National University of Computer & Emerging Sciences <i>Bachelor of Science in Computer Science</i>	Expected 2026 <i>8th Semester — Faisalabad, Pakistan</i>
---	---

Experience

Frontend Development Intern <i>Nexus AI Digital — Virtual Experience (Remote)</i> - Selected competitively for a 4-week remote internship focused on real-world frontend development. - Built and deployed frontend projects independently while receiving mentorship from senior developers.	2025
Web Development Intern <i>Team Paxis Pro</i> - Contributed to frontend development and product hunting tasks in a fast-paced startup environment. - Developed and maintained e-commerce features using modern JavaScript frameworks and responsive design principles.	2025

Projects

IntelliMeet | *AI-Powered Multilingual Video Conferencing System (FYP)*

- Web-based AI system enabling real-time multilingual communication with live speech-to-text transcription and real-time language translation for cross-lingual collaboration.
- Integrated NLP techniques for automatic meeting summarization and extraction of key action items, reducing language barriers in global and remote work environments.

TextExtract | *AI-Powered OCR & Translation Platform*

- Full-stack web app featuring drag & drop uploads, OCR via Tesseract.js, PDF conversion, Google Translate API integration, multi-format downloads (.txt/.docx/.pdf), and usage analytics dashboard.

Chest X-ray Disease Detection System

- Semester project utilizing computer vision techniques including segmentation and contour analysis to detect and visually highlight bacterial infections in chest X-ray images.

Real-Time Object Detection with YOLOv8

- Developed a real-time multi-object detection system using YOLOv8 for live webcam and video stream input with bounding box annotations and class labeling.

Medical Image Enhancement Studio

- Python-based tool to enhance medical images using Histogram Equalization and Power-Law (Gamma) Transformation, improving contrast and diagnostic visibility.

Zero Lifestyle | *Full-Stack E-Commerce Platform*

- Responsive e-commerce site featuring a dynamic product catalog, shopping cart, secure checkout flow, and payment gateway integration.

Leadership & Activities

Logistics Co-Head <i>YPDC (Youth Peace and Development Corps) — FAST NUCES</i> - Co-lead logistics operations for a university youth development society; oversaw vendor coordination, resource allocation, and budget planning for multiple large-scale campus events. - Managed and motivated a team of volunteers to ensure timely, high-quality execution of society-wide initiatives, consistently achieving strong stakeholder satisfaction.	2025 – Present <i>Faisalabad, Pakistan</i>
